Beth is correct in her explanation of the "rules of the road" during the shutdown. She is also correct that Stephanie is not reading or responding to emails.

CPG is not going to have the equipment (small boat) in place after this week and tides are right for accessing the Third River Locations this week.

I'm pretty sure Stephanie cannot check emails.

It's my understanding that sampling can occur for anything that had direct EPA approval prior to 1 Oct 13. If there are changes/modification or anything that varies from that approved plan; work should not proceed because EPA has had no technical input or approval.

I apologize for the inconvenience.

Regards, Beth

Importance: High

Can we do this these three starting on Tuesday?

>>> "Simmons, Doug" <doug.simmons@aecom.com> 10/14/2013 9:12 AM >>>

We would like to begin the Third River sampling tomorrow. Because of tides and boat size it is going to take us several days to get the two stations above the bridge done.

Is it okay to begin tomorrow?

If everything continues as planned we will wrap up with the small boat this week and the larger boat by mid next week.

Doug
